Teams UI Redesign

The old design

The old design

poor outlines

Users get confused between
different sections and buttons
Design looks not clear or professional

The icons are unclear

It takes more effort to understand
Users get confused between icons

Color Mismatch

The colors used in the
design are not related to
the logo or the
application's branding,
which makes the
interface look
inconsistent and less
professional.

Issues with Team Icon Representation

The design of the team icons does not represent the teams clearly and
is confusing, because two different teams can have the same icon

# The old design

تحليل وتصميم نظم
المعلومات 2026

Complicated Channel Actions

Leaving or sharing a channel
requires extra steps through
the three dots, with too many
unnecessary icons making it confuse.

Hide

Manage team

Add member

Add channel

Copy link

Leave team

Manage tags

Share "Meeting in ...cording.mp4"

Add a name, group, or email

Add a message

Copy link   Send

Sharing and Layout Issues

The outlines and icons are not consistent.
Sharing requires copying the link manually,
with no direct share icons for WhatsApp,
Messenger, or Telegram.

The old design

Unclear Icons and Outlines

The icons are not clear, and the outlines are inconsistent
This makes the interface less organized and harder to us

In files :

There is no clear or direct icon for file sharing
making it difficult for users to share files easily

## Icons and Sharing Issues

in posts:

1:the way to delete ,pin ,forward is not clear
and the to get it not clear too as you should make
mouse at right of the post to view **(...)**and click on
it to view icons
2:there is no option to edit posts
3: there is no direct icon to share as file ,too

The old design

lack of safe message

There is no safe message when you delete post

font is not clear

Lack of Confirmation Messages

There is no confirmation message shown when a post is successfully published. Additionally, there is no option to delete a post with a confirmation message indicating that the post has been successfully removed, which may confuse users about the status of their actions.

no confirmation message when you pinned message or removing pinning.

▼ Main Channels
  General

Poor Navigation Experience
The All Teams button functioned only as a back button to
the main page instead of displaying all teams in one view.
This design forced users to move through multiple
screens to access another team, increasing unnecessary
steps.
Navigating between teams became slow and confusing,
especially when many teams existed

Content Overload in a Single Channel (General)
All activities were placed inside one channel
:includi ,(General)
Posts, Conversations, Meeting
This caused content to become cluttered
and difficult to followg and
-Finding specific meetings was time
.consuming

The proper solutions

- **All Teams as a List View**
The All Teams section was redesigned into a list view that displays all teams in a single place. This allows users to switch between teams directly without returning to the main page, reducing navigation steps and saving time. The new layout improves usability and makes managing multiple teams faster and more efficient.

- **Dedicated Meetings Page**
A new Meetings channel was added to separate meetings from general posts and conversations. Each lecture or meeting is displayed as an individual item, which keeps content organized and easy to follow. This separation helps users quickly locate meetings without confusion or unnecessary scrolling.

- **Automatic Transition to Recorded Lectures**
After a live lecture or meeting ends, the same meeting card automatically converts into a recorded lecture. This provides a seamless transition between live and recorded content, ensuring continuity and eliminating the need to search for recordings elsewhere.

- **Improved Icons and Outlines**
We refined the outlines of buttons and other interface elements to make them more visually clear and consistent. All icons were standardized in terms of size, color, and style, ensuring a more polished and professional appearance. This makes the interface easier to navigate and visually appealing for users.

- **Optimized Layout for Messages and Links**
The size of the "Add Message" feature was reduced to minimize distraction. The Send and Copy Link buttons were repositioned slightly higher on the screen for easier access and aligned to the top-left area. This adjustment improves usability and ensures important actions are more noticeable and accessible.

- **Direct Sharing and File Upload Options**
New icons were added for WhatsApp, Messenger, Telegram, along with a "+" icon for additional sharing options. Users can now share lecture links directly to WhatsApp with one click, without manually copying and pasting the link. Additionally, a dedicated icon for file uploads was included, making it faster and more intuitive to share files directly from the interface.

The Proper Solution

Adding confirmation message
we adding confirmation messages for post or remove and pin or remove pin to post making user be sure about what he did is done successfully

Adding safe message
we adding safe messages to prevent users from making errors if he click on delete post by chance he can cancel this by safe message

makeing font more clear
making font more clear make user more confortable when he look at page
